 - ✓ Flexible solutions to allow for distant learning
 - ✓ Administrative System to maintain full control over the students access, results and statistics

TEST4U interactive training material

- TEST4U supports the following applications

Some customers' good words

I first tried TEST4U as a demo program. I looked at the demo questions and I said that this program will guarantee me to pass the exam since the book materials and exercises are not sufficient at all.

I purchased all test exams and I solved them all. When I started doing the exam, I was very confident because the exam interface is the same as TEST4U program and this is a really important point to feel comfortable with the exam interface and buttons.

Gladly, I passed all my exams and became MOS Master. Thank you TEST4U

Mohammad El Medawar
IT & Soft Skills Trainer, Beirut, Lebanon

During the Code week we used TEST4U learn to code lessons. It was a great opportunity for students to test themselves using an on-line test.

In this way they were able to test their knowledge and level they achieved. At the same time, they had the opportunity to see that what they learned is indeed useful.

We enjoyed during the lessons. It was competitive, fun and at the same time we have worked very seriously testing knowledge.
